 french furniture design 

Olivier Santini has been passionate about drawing, always prioritizing innovative ideas and originality. Throughout his studies, he developed a love for aesthetics, graphic forms, and the lines of materials, while cherishing interactions and exchanges with artisans of the arts.

At the age of 20, Olivier founded a group that brought together marketing and design agencies, putting his experience and creativity to work for his clients. Success was not long in coming. Observing creations in the furniture industry, he noted excessive monotony and a lack of color, perceiving that everything seemed to mirror each other. Consequently, he decided to create his own furniture collection.

His mission: to design distinctive, fun, “pop” furniture, with optimistic and refreshing colors that bring light and cheerfulness to both indoor and outdoor spaces. In 2019, he launched the YOMI collection, an indoor and outdoor furniture line that is playful, attractive, and innovative, unparalleled in the market. This furniture is light and easy to transport and install.

In 2022, he introduced the MW collection, a line of colorful and elegant luxury furniture, acting as numbered and signed works of art, capable of withstanding the test of time and trends. The MW collection earned him the MIAW Design Award in 2022, and the DNA Paris Design Award in 2023, with the MW05 model.

YOMI COLLECTION

The new YOMI armchairs and sofas have evolved. The seats are no longer welded to the backrests. This makes it possible to mix and match colors and facilitates cleaning.
